1	Hello World	1
---	-------------	---

Abstract

Simple Literate Programming example.

1 Hello World

We print hello world with the built-in function puts.

1a	$\langle main\ 1a \rangle \equiv$ <pre>int main() { puts("Hello World!"); }</pre> <p>Default empty header.</p>	(1c)
1b	$\langle main.h\ 1b \rangle \equiv$ <pre>#pragma once</pre> <p>Final internal implementation. Will print Hello World!.</p>	
1c	$\langle main.c\ 1c \rangle \equiv$ <pre>#include "main.h" #include <stdio.h> $\langle main\ 1a \rangle$</pre>
